

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method for playing ~~optical disc,~~  
~~comprising the steps~~ content having a plurality of distinct  
branches playable on a playback device, the method comprising acts  
of:

~~detecting whether to meet a branch point~~ indication within the  
~~playing contents~~ content, the branch indication identifying which  
branch of the plurality of distinct branches of the content to  
playback; and

~~creating a corresponding bookmark, when meeting a branch point~~  
~~of the playing content,~~ corresponding to the detected branch  
indication to record relevant information of said branch point  
indication for navigation of the content for subsequent playing.

2. (Currently amended) The method for ~~playing optical disc~~ according to claim 1, ~~further including~~ comprising acts of:

~~fast-forwarding or fast-rewinding;~~

~~browsing identifying a bookmark of a branch point if meeting~~  
corresponding to the branch point indication passed during fast-  
forwarding or fast-rewinding a forward/rewind operation of the  
playback device; and

~~selecting a specific branch to fast-forward or fast-rewind of~~  
the content to forward/rewind the content according to the  
information of recorded in the identified bookmark as for the  
navigation of the content.

3. (Currently amended) The method for ~~playing optical disc~~ according to claim 1, ~~further comprises showing~~ comprising an act  
of displaying the bookmark corresponding to a the branch point  
indication to the user when meeting the branch point indication is  
encountered during the playback of the content so as to provide the

user with a choice for selecting at least one of the plurality of content branches for viewing.

4. (Currently amended) A method for playing content having a plurality of distinct branches associated with an optical disc playable on a playback device, the method comprising the stepsacts of:

detecting whether to meet an interruption or pause is met during navigation; and

creating a corresponding bookmark, when meeting an interruption or pause of the playing, to record relevant information of such interruption point or pause point for navigation of the subsequent resumption of playing, wherein the bookmark identifies which branch of the plurality of distinct branches of the content where the interruption or pause is met.

5. (Currently amended) The method ~~for playing optical disc~~ according to claim 4, wherein the information stored in the

bookmark includes at least one of ~~the two~~, a name or an ID of the optical disc.

6. (Currently amended) The method ~~for playing optical disc~~ according to claim 5, further ~~comprises~~ comprising acts of:

resuming the playing from the interruption or pause point, and

~~reading out~~ displaying the information stored in the bookmark including at least one of the two, a name or an ID of the optical disc which ~~needs~~ includes the content requiring the resumption of the playing.

7. (Currently amended) The method ~~for playing optical disc~~ according to claim 6, further ~~comprises~~ comprising acts of:

~~browsing~~ determining the information of the bookmark if it is ~~detected out that the information stored in the bookmark contains~~

includes the name or ID of the optical disc which is read out  
played; and

selecting a specific branch to ~~fast-forward or fast-rewind~~  
forward/rewind using the information of stored in the determined  
bookmark as a for navigation of the content.

8. (Currently amended) An optical disc player for playing  
content having a plurality of distinct branches associated with an  
optical disc, the optical disk player comprising:

a detecting module for detecting ~~whether to meet a branch~~  
~~point indication within the playing contents or not content, the~~  
branch indication identifying which branch of the plurality of  
distinct branches of the content to playback; and

a creating module ~~is used to create a corresponding at least~~  
~~one bookmark when meeting a corresponding to the detected branch~~  
~~point, and indication to record relevant information of such such~~  
the branch point indication for navigation of the content for  
subsequent playing.

9. (Currently amended) The optical disc player according to claim 8, further ~~comprises~~ comprising:

a navigating module, ~~which is used~~ to browse the content of stored in the at least one bookmark, and ~~make use of such the~~ content for the navigation of ~~playing process~~ the content.

10. (Currently amended) The optical disc player according to claim 8, wherein the bookmark comprises ~~the relevant information of~~ relevant to the branch-point indication.

11. (Currently amended) The optical disc player according to claim 8, further ~~comprises~~ comprising a bookmark storage for storing the bookmarks and corresponding information.

12. (Currently amended) The optical disc player according to claim 8, wherein each bookmark of each branch point comprises a back link pointing to ~~the~~ a previous bookmark and a forward link pointing to the next bookmark.

13. (Currently amended) An optical disc player for playing content having a plurality of distinct branches associated with an optical disc, the optical disc player comprising:

a detecting module for detecting whether ~~to meet~~ an interruption or pause is met during navigation; and

a creating module for creating a corresponding bookmark as a navigation for the resumption of the play to record the relevant information of the interruption point or pause point when meeting an the interruption or a pause, wherein the bookmark identifies which branch of the plurality of distinct branches of the content where the interruption or pause is met.

14. (Currently amended) The optical disc player according to claim 13, further ~~comprises~~ comprising a navigating module for

browsing the bookmark and selecting a specific branch using the information of the bookmark ~~as~~ afor navigation.

15. (Original) The optical disc player according to claim 13, wherein the bookmark comprises the relevant information of the interruption point or the pause point.

16. (Currently amended) The optical disc player according to claim 13, further ~~comprises~~ comprising a bookmark storage for storing the bookmarks.

17. (New) The according to claim 1, wherein the content includes at least one predefined branch point for indicating which branch of the content to playback and the branch indication is a branch point.

18. (New) The according to claim 1, wherein the branch indication is selected from at least one of interruption and pause

of the content playback.

19. (New) The optical disc player according to claim 8, wherein the content includes at least one predefined branch point for indicating which branch of the content to playback and the branch indication is a branch point.

20. (New) The optical disc player according to claim 8, wherein the branch indication is selected from at least one of interruption and pause of the content playback.
